PROJECT REPORT

Bowelscan

Bowel cancer is Australia's most damaging internal cancer, killing more than 4600 people every year. But bowel cancer is very curable if you catch it early.

In March each year, Rotary clubs throughout Western Australia support Bowelscan.

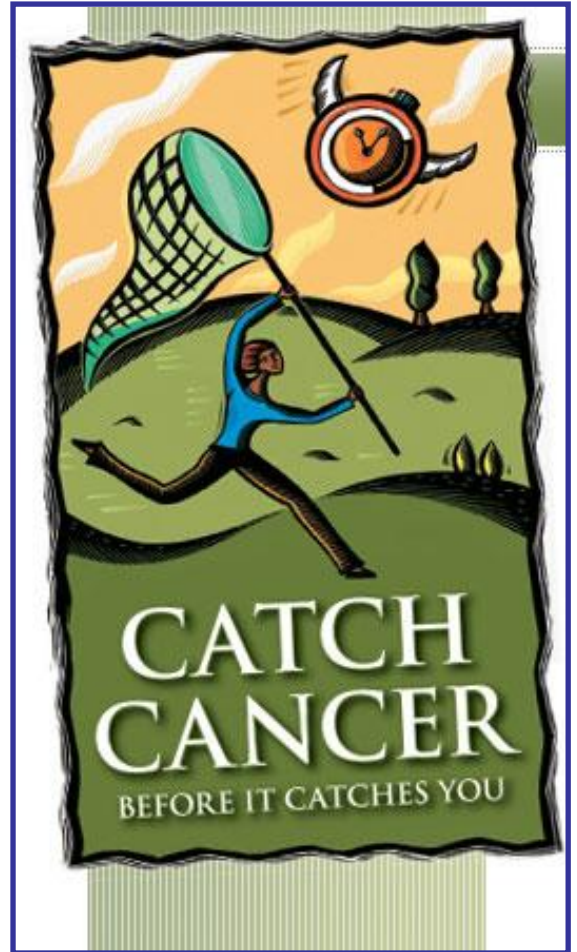

During that month, Bowelscan test kits can be purchased at a low cost from participating pharmacies. The returned test kits are tested by the participating pathology laboratory at no cost.

Men and women aged 40 and over are encouraged to take the test each year.

In past years, the Bowelscan tests have led to the discovery of conditions including colorectal cancer, rectal cancer, a tumor in the ascending colon and neoplasia as well as a range of common ailments such as polyps, haemorrhoids and diverticulitis.

Look out for the Bowelscan test kits at your local pharmacy in March each year.

If your pharmacy does not currently support Bowelscan in March each year, suggest that the pharmacist contact a local Rotary club.

HOW TO SUPPORT BOWELSCAN –

Make a donation to the cost of running and promoting Bowelscan \$ _____
